Education

New Jersey Institute of Technology

December 2026

Bachelor of Science in Computer Science

Newark, NJ

Projects

DeckMaster (Android App)

Nov 2025

<https://github.com/Marco-Scherillo/DeckMaster>

- The app can scan cards from the camera and read the text in order to mark off the equivalent card in the app's database for that user.
- Group project developed for Android Application Development course.
- Backend and Frontend were designed using Kotlin and XML in Android Studio.

Boat Ride Sharing Service (Front-End)

Nov 2023

<https://nicknov25.github.io/CodeCruisers/HackNJIT/>, <https://github.com/nicknov25/CodeCruisers>

- HackNJIT 2023 Hackathon Project created in about 24 hours.
- Used GitHub Pages to host homepage, login/signup page, medical conditions page.
- Used OpenWeatherMap's REST API to give real-time weather updates.
- Collaborated with team members, delegating tasks as needed.
- Backend developed using Javascript and local storage to persist user data within the browser.
- Built frontend using React to manage state and navigation.

Yu-Gi-Oh Deck Builder (Full-Stack)

May 2023

<https://github.com/nicknov25/YugiohLegacy>

- A functional Yu-Gi-Oh deck builder and an in-progress version of a playable version of the classic card game (following the pre 2004 TCG rules) including a login/account creation screen, deck builder, deck view, deck selector, and stats about your account.
- Used MySQL to store and query card combinations and persist user data.
- Wrote frontend in Java using JavaFX for rendering.

Volunteer Work

Vice President of Communications Alpha Sigma Phi Fraternity March 2026 - Present

- Managed a discord server of about 150 people, handling roles, channels, and permissions.
- Created a shift management and replacement program to simplify meetings.
- Managed Nextcloud server for all undergraduates and alumni with assistance from alumni.

Computer Science Club Officer Westchester Community College Sept 2022 - May 2023

- Acted as treasurer (Sept 2022-Dec 2022) and president (Jan 2023-May 2023) of the computer science club. Handled budgetary concerns for the club, helped get basic structure of lesson plan together for our tutorial sessions, acted as primary tutor for the club, and set up the club's Discord server.

Work History

System Administrator Stamford Ophthalmology Sept 2018 - Sept 2026

- Handled account management for all employees including account creation, deletion, and password resets.
- Handled software deployment and upgrades, AD deployment and role management for all workstations, including vulnerability remediation.
